An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

IN THE CLAIMS:

Claims 5-6, 8, 46-47, and 99-104 were cancelled without prejudice.

Claims 3, 34, and 36 were amended as follows:

---Claim 3 (currently amended). Method for the inhibition of carbon flow in the glycolytic direction in a plant cell by increasing the intracellular availability of trehalose-6-phosphate by transformation of said plant cell with a vector comprising a sequence encoding [an antisense gene for]trehalose-6-phosphate phosphatase (TPP) operably linked to a promoter in antisense orientation, which upon expression is able to inhibit functional activity of the endogenous trehalose-6-phosphate phosphatase (TPP) gene.---

---Claim 34 (currently amended). A cloning vector which comprises a sequence encoding [an antisense gene for]trehalose-6-phosphate phosphatase (TPP) operably linked to a promoter in antisense orientation, which upon expression is able to inhibit functional activity of the endogenous trehalose-6-phosphate phosphatase (TPP) gene in a plant cell.---

---Claim 36 (currently amended). Plant characterized in that it or one of its ancestors is transformed with a vector comprising a construct comprising a sequence encoding [an antisense gene for]trehalose-6-phosphate phosphatase (TPP) operably linked to a promoter in antisense orientation, which upon expression is able to inhibit

Art Unit: 1638

functional activity of the endogenous trehalose-6-phosphate phosphatase (TPP) gene in a cell of said plant, said plant still containing said construct[antisense gene].---

Authorization for this examiner's amendment was given in a telephone interview with Edourd Lebel on 03/19/2007.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Brent Page whose telephone number is (514)-272-5914. The examiner can normally be reached on Monday-Friday 8-5.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Anne Marie Grunberg can be reached on (571)-272-0975. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
